Growing area

Epona is an early barley with a high yield potential. **Epona** is well adapted to the Mediterranean areas. Sowing could be done as well in dry soils as under irrigation.

CTPS/ARVALIS notations (1=susceptible, 9= very good level); () : notes to be confirmed; CTPS controls: Sebastian, Pewter (07), Henley (08); KPH: Kilo Per Hectoliter; TGW: Thousand Grain Weight
